

"Talking to the Stars"

We've been talking to the stars
And now we know they listen
Cause we wished for you with all our hearts
If we may
If we might
We have just a few more wishes:

**[Our wish is that you won't forget
How loved and wanted you are
That the sky is the limit you set
For the dreams in your heart**

**And we hope you'll play in the dirt
See the good in the world
Like your mom always does
That you'll speak your mind like your dad
He'll teach you how to laugh
When the going gets tough]**

We've been talking to the stars
And now we know they listen
Cause we wished for you with all our hearts
If we may
If we might
We have just a few more wishes:

**[We wish for endless adventures
Hiking with you, seeing the world
To watch you on your Grand Dad's tractor
Gardening with Grandma
Our beautiful girl**

**Quiet days as a family of three
The long nights and the crazy
We'll learn side by side
We can't wait to watch our girl grow
We'll be in the front row
Your whole life as you shine]**

We've been talking to the stars
And now we know they listen
Cause we wished for you with all our hearts
If we may
If we might
We have just a few more wishes
